

Tejas Aher

Lead Data Engineer

Profile Summary

Overall Experience: 9+ Years

Contact: +91 9689166517

Location: Pune

Email: tejasaher1994@gmail.com

LinkedIn: <https://www.linkedin.com/in/tejas-a-9b9728b7/>

Lead Data Engineer with 9+ years of experience in building scalable data platforms, ELT pipelines, and cloud-based data solutions. Skilled in data modeling (Kimball), Medallion architecture, and performance optimization, with experience leading teams and delivering analytics-ready data solutions.

Skills

- **Technical Skills**

- **Data Engineering & Architecture:**

ELT Pipelines, Data Modeling (Kimball Methodology – Star Schema, SCD's, Fact & Factless Fact Tables), Medallion Architecture (Raw → Cleaned → Curated), Data Warehousing, Data Quality & Lineage

- **Cloud & Data Platforms:**

AWS (S3, Lambda, EC2, EKS, RDS, IAM, SNS, SES, API Gateway), Snowflake

- **Data Processing & Orchestration:**

DBT, Meltano, Apache Airflow, Dagster

- **Programming & Querying:**

Python, SQL, PL/SQL, Shell Scripting, Jinja

- **Data & Backend Development:**

FastAPI, Flask, REST APIs, Streamlit

- **Libraries & Frameworks:**

Pandas, Polars, NumPy, DuckDB, SQLAlchemy, Pytest, boto3

- **DevOps & CI/CD:**

Docker, Kubernetes, Jenkins, Helm

- **Monitoring & BI Tools:**

Grafana, Kibana, Splunk, Metabase

- **Tools & Platforms:**

VS Code, PyCharm, Jupyter, Git, Jira, Confluence, AWS CLI, DBeaver

- **GenAI Exposure:**

Snowflake Cortex AI, LLM-powered data applications (Streamlit)

Professional Experience

Jet2 Travel Technologies

Lead Data Engineer | 23 Feb 2026 – Present

- Leading data architecture and design decisions for migration to Snowflake, ensuring scalability, performance, and cost efficiency
- Defining data modeling standards using Kimball Methodology (star schema, SCDs, fact & dimension design)
- Driving implementation of Medallion Architecture (Raw → Cleaned → Curated) to standardize and scale data pipelines
- Mentoring engineers, conducting code reviews, and improving development and deployment best practices
- Collaborating with business stakeholders and cross-functional teams to align data platform design with analytics and reporting needs. SAFe Practitioner.
- Contributing to innovation initiatives, including LLM-powered data applications using Snowflake Cortex and Streamlit

Senior Data Engineer | 27 Oct 2024 – 23 Feb 2026

- Delivered migration of on-premise SQL Server data warehouse to Snowflake, designing scalable ELT pipelines and data models
- Designed conceptual, logical, and physical data models using Kimball Methodology (SCD Type 1/2, fact & factless fact tables)
- Built and orchestrated data pipelines using DBT, Apache Airflow, and Docker, enabling efficient and reliable data transformation workflows
- Implemented layered data architecture aligned with Medallion Architecture to improve data quality, traceability, and maintainability
- Optimized data pipelines and warehouse performance, improving query efficiency and reducing processing time
- Contributed to cloud migration initiatives, including Snowpipe POC and infrastructure setup using Terraform on AWS
- Developed a Streamlit-based POC leveraging Snowflake Cortex Search for natural language-driven data discovery
- Coordinated with team members on delivery planning, task tracking, and resolving technical challenges

LTIMindtree

Specialist Data Engineering | 30 May 2024 - 25 Oct 2024

Worked on a migration project where I am migrating the data from the existing Oracle data warehouse to Snowflake. Created data transformations using the DBT tool and for data ingestion we are using Fivetran and HVR tools.

Implemented data quality testing using DBT. Extensively used DBT utilities and features to improve the data warehouse transformations. I worked on data governance initiatives within Snowflake, ensuring data integrity, security, and compliance by implementing access controls, data masking, and auditing policies. I leveraged DBT to maintain robust data transformation workflows, ensuring consistency and quality across all datasets, while also implementing data lineage and documentation features to enhance transparency and traceability in the data pipelines. Utilizing the built in snowflake features such as snowpipe, streams, tasks, tags, time-travel, user defined functions.

Following the Kimball architecture for schema design. Worked on dimensional modeling.

Persistent Systems LTD

(Engineering Lead | 13 July 2021 - 27 May 2024, Pune)

Designed and implemented comprehensive data workflows for healthcare clients, leveraging extensive knowledge of AWS cloud services.

Utilized knowledge of Slowly Changing Dimensions (SCD), Change Data Capture (CDC) and core data warehousing principles to develop cost-effective, secure systems for the collection, storage, and distribution of data for SaaS applications.

Created and orchestrated data pipelines using Dagster, achieving cost minimization and maximizing benefits compared to other open-source orchestrators.

Collaborated with architects to define robust data models in Snowflake, utilizing services such as stages, Snowpipe, streams, tasks, and UDFs, as well as features like time-travel, clones, masking, and tags. Worked with both structured and semi-structured data.

Employed DBT Core to execute complex data transformations efficiently and reliably.

Deployed and maintained various applications on Amazon EKS, demonstrating a strong understanding of microservices architecture and service integration.

Developed Snowflake integration by creating serverless data lake APIs(Fast-API), enabling transformed data delivery to end consumers, including frontend and BI applications.

Utilized DuckDB to offload complex OLAP queries from Snowflake, optimizing transformation performance.

Created NewRelic integration with multiple services to gain insights into application logs, enhancing monitoring capabilities. Developed Slack integration to provide real-time alerts on production pipeline failures

Documented processes and designs on Confluence for future reference and provided guidance to junior team members.

Actively participated in Agile/Scrum ceremonies, taking ownership of tasks and ensuring their timely completion.

Conducted thorough code reviews, including pair programming sessions, to maintain high code quality and adherence to best practices.

Contributed to the successful launch of new projects, developing applications from scratch and collaborating closely with team members throughout the development process.

Accenture Solutions PVT LTD

(Application Development Senior Analyst | 28 Nov 2016 - 12 July 2021)

Developed and deployed Python scripts to automate and resolve integration issues within the telecom infrastructure.

Created an automated deployment flow using Jenkins and GitHub, streamlining job deployment processes.

Automated various manual tasks, significantly reducing the time and effort required for routine operations, saving the team an estimated 20 hours per week.

Employed Python libraries and tools to create efficient, reusable scripts for data extraction, transformation, and loading (ETL) processes.

Successfully developed a Django application that streamlined the order creation process for the L2 team, resulting in a 30% increase in order processing efficiency.

Resolved critical integration issues, leading to a 15% reduction in system downtime.

Created numerous dashboards and reports for Telecom customer churn analysis, effectively managing a high volume of data.

Education

Savitribai Phule Pune University/ Bachelor of Engineering (Electronics and Telecommunication)

July 2012 - May 2016, Pune

Percentage: 60.83

KTHM College Nashik/ HSC (12th)

June 2011 - March 2012, Nashik

Percentage: 75.5

K. K. Wagh Vidyabhavan Bhausaheb Nagar/ SSC (10th)

March 2010, Nashik

Percentage: 95.27

Awards & Recognition

-
1. Apex award - Accenture Solutions private ltd
 2. R&R Reward - Individual contributor - Persistent Systems
 3. Top Talent - 2024 - Persistent Systems

Certifications

-
1. AWS Certified Solutions Architect - Associate
 2. DBT Fundamentals
 3. Snowflake Hands On essential and Data sharing
 4. GenAI Practitioner 2023

Hobbies

-
- Photography, Video Editing , Hiking, Sketching
